

# Costin Ioan COȘOIU

Associate Professor at Hydraulics, Sanitary Engineering and Environmental Protection Department  
Laboratory Director at Aerodynamics and Wind Engineering Laboratory "Constantin Iamandi"  
Technical University of Civil Engineering of Bucharest

Adress Str. Cristea Mateescu, Nr. 72, Sector 2, Bucharest, Romania  
Telephone 0021 243 36 60  
e-mail costin[at]hidraulica.utcb.ro  
Nationality Romanian

## Core competences

Computational Fluid Dynamics (CFD)  
Aerodynamics  
Turbulence  
Fluid Dynamics  
Numerical Analysis  
Engineering

## Experience

PhD thesis in the domain of wind engineering with specialization in wind turbines equipped with flow control devices

Computational Fluid Dynamics (CFD) simulations, tests, analysis, and correlation  
Visualization, animation, and post processing of scientific data  
Comprehensive understanding of complex physical phenomena  
Project management  
Knowledge in interpreting flow structures and analyzing flow fields  
Wind tunnel testing and measurements (analyzing wind effects on wind turbines, structures, pedestrian comfort and pollution)  
Experimental aerodynamic development of technology and tools  
Aerodynamic innovation and invention of new solutions for fluid flow  
Wind turbine aerodynamic design and testing

## Specialties

### CFD

- Meshing: Gambit, Fluent with meshing (Legacy TGrid), ICEM/CFD
- Simulation: Fluent
- Postprocessing: Tecplot 360, Fluent, ParaView

### PIV measurements (2D2C)

- ILA 2D PIV system

### Programming and Scientific Computing

- C/C++
- MatLAB

### LDV measurements (3D/2D)

- Dantec FiberFlow
- Dantec Flowlite

### CTA measurements (1C)

- Dantec StreamLine Pro
- Dantec MiniCTA

### Teaching and student supervision

## Research Projects

**SWAN34** – Small Ducted Wind Turbine Equipped with Passive Flow Control Devices  
**January 2017 – June 2018**  
<http://swan34.utcb.ro/>

### Project Director

The main objective of the project is to reach a Technology Readiness Level (TRL) equal to TRL4, starting from a TRL level equal to TRL3, for a new energy production technology using small ducted wind turbines equipped with passive flow control devices. The scope of the technology is to harvest energy from wind in sites where aeolian potential is low or in urban environment using ducted wind turbines.

**PD-193** – Device for passive flow control in ducted wind turbines  
**2010-2012**

### Project Director

Investigate, up to a Technology Readiness Level (TRL) equal to TRL3, using experimental and numerical simulation, the air flow in ducted horizontal axis wind turbines, with small or medium rotor diameter, equipped with passive flow control devices, placed in sites where wind potential is low or in urban environment.

**TD-242** – Contributions to the optimization of wind turbines design and operation.  
**2007-2008**

### Project Director

Numerical and experimental research on small ducted wind turbines aerodynamics and performances and PhD Thesis completion

### Other research projects

I was a member as a CFD specialist/researcher in more than 10 research projects with private contractors and more than 12 research projects financed from public funds by grant-based competition

## Employment History

October 2015 – present

**Technical University of Civil Engineering of Bucharest  
Hydraulics and Environmental Protection Department  
Associate Professor**

**Bucharest, RO**

Responsibilities: Lectured, prepared exams and assignments, held office hours for *Introduction in CFD* and *Hydraulics II* courses. Conducted labs and workshops, prepared exams and assignments, held office hours for *Hydraulics*, *Fluid Mechanics*, *Wind Engineering* and *Hydraulic Machinery* courses. Mentor for license and master thesis for students that were developing their studies in the department.

August 2012 – October 2015

**Technical University of Civil Engineering of Bucharest  
Hydraulics and Environmental Protection Department**

**Bucharest, RO**

### Lecturer

Responsibilities: Lectured, prepared exams and assignments, held office hours for *Introduction in CFD* and *Fluid Mechanics and Hydraulic Machinery* courses. Conducted labs and workshops, prepared exams, and assignments, held office hours for *Hydraulics*, *Fluid Mechanics*, *Wind Engineering* and *Hydraulic Machinery* courses. Mentor for license and master thesis for students that were developing their studies in the department.

August 2010 – August 2012

**Technical University of Civil Engineering of Bucharest  
Hydraulics and Environmental Protection Department**

**Bucharest, RO**

### Researcher

Manager and promoter of the PD-193 research project entitled *Device for passive flow control in ducted wind turbines*. Scope of the project: optimization of the shape of the nozzle and flow around the ducted wind turbines, using passive flow control devices. Conducting numerical simulations (using ANSYS FLUENT) and experimental studies in aerodynamic wind tunnel on the air flow around ducted horizontal axis wind turbines, with

small or medium rotor diameter, equipped with passive flow control systems, which can be placed in sites where wind potential is low or in urban spaces.

Promoting the project results through publications/presentations quality papers in academic journals and conferences and also, media materials on the web, radio and print channels in order to transfer the research know-how towards academia and industrial contractors.

June 2005 –  
August 2010

**Technical University of Civil Engineering of Bucharest  
Hydraulics and Environmental Protection Department**

**Bucharest, RO**

**Assistant Professor**

Lectured, prepared exams and assignments, held office hours for *Fluid Mechanics and Hydraulic Machinery* course.

Conducted labs and workshops, prepared exams and assignments, held office hours for *Hydraulics, Fluid Mechanics, Wind Engineering and Hydraulic Machinery* courses.

Mentor for license and master thesis for students that were developing their studies in the department.

Manager of the TD-242 (2007 - 2008) research project entitled *Contributions to the optimization of wind turbines design and operation*.

October 2003 –  
June 2005

**Technical University of Civil Engineering of Bucharest  
Hydraulics and Environmental Protection Department**

**Bucharest, RO**

**Teaching Assistant**

Conducted labs and workshops, prepared exams and assignments, held office hours for *Hydraulics, Fluid Mechanics, Wind Engineering and Hydraulic Machinery* courses.

## Education and Training

October 2003 –  
September 2008

**Technical University of Civil Engineering of Bucharest  
Hydrotechnic Faculty**

**Bucharest, RO**

**PhD**

PhD thesis in the domain of wind engineering with specialization in wind turbines equipped with flow control devices

18 -23 September 2006

**“Politehnica” University of Timisoara  
Mechanical Engineering Faculty  
National Center for Engineering Systems with Complex  
Fluids**

**Timișoara, RO**

**Course of Numerical Methods in Fluid Dynamics and FLUENT applications**

CFD / Fluid Mechanics / FLUENT

October 1998 –  
July 2003

**Technical University of Civil Engineering of Bucharest  
Construction Equipment Faculty**

**Bucharest, RO**

**Mechanical Engineer**

Mechanical Engineering / Cranes / Construction equipment / Hydraulics equipment

March 2001 –  
June 2001

**Université Claude Bernard Lyon 1  
UFR de Mécanique**

**Lyon, FR**

**Socrates Erasmus Students Exchange Program**

Mechanical Engineering / Thermodynamics / Data acquisition

## Languages

Romanian	Native or bilingual proficiency
English	Full professional proficiency
French	Limited working proficiency

## Member of professional organizations

<b>Romanian Association for Wind Engineering</b>	Since 2017. Founding Member.
--	------------------------------
